What is an apple?

An apple is a crunchy, bright-colored fruit, one of the most popular in the united states. "An apple a day keeps the doctor away." Although eating apples isn't a cure-all, it is good for your health.

European settlers brought apples with them to the Americas. They prefered them to North America's native crabapple, a small, tarter fruit.

Today,many types of apples are grown in the U.S., but a small percentage of the ones you can buy in grocery stores are imported. Each type of apple has a different shapes, color, and texture. An apple can be sweet or sour and its flavor can vary depending on what type you're eating.
